RESEARCH INTERESTS

Empirical Software Engineering, Mining Software Repositories, Software Testing, Software Maintenance, Software Evolution, and Software Architecture.

EXPERIENCE

Postdoctoral Researcher at TU Delft

2016 - current

Supervisor: Arie van Deursen

Focus: Empirical software engineering, advising of master students, co-teaching software architecture and software testing.

Co-Founder at Alura

2012 - 2015

Focus: Tech leader of the e-learning platform development team; strategic decisions; development of several online courses (37 courses, 169,001 enrollments, median evaluation of 8.84).

Tech Lead and Trainer at Caelum

2010 - 2015

Focus: In-company consulting and training in several topics (Java, software testing, agile methodologies). Total: 1,928 hours, 996 students, 27 companies.

Lecturer at Mackenzie University (Brazil)

2012 - 2015

Focus: Teaching “Software Engineering Topics” (2 editions), and “Data Persistence” (2 editions) for the extension program.

Software Developer at Locaweb

2009 - 2010

Focus: Member of the team responsible for the billing systems; extensive legacy refactoring from Stored Procedures to C#; TDD evangelist.

Software Developer at VeriFone Brazil

2007 - 2009

Focus: Member of the team responsible for the system in charge of the transferring cryptographic keys to POSs in a secure way; embedded development in C; software product lines.

EDUCATION

- **2012 - 2016:** PhD in Computer Science, *University of São Paulo, Brazil*.
- **2009 - 2012:** Master in Computer Science, *University of São Paulo, Brazil*.
- **2004 - 2007:** Bachelor in Computer Science, *Mackenzie University, Brazil*.

4. **Aniche, M. F.** Test-Driven Development: Test and Design in the Real World. Casa do Código, 1. ed., 2012. 4,235 copies sold. *In portuguese.*

TEACHING

1. Development of 37 online courses to the Alura platform: *VRaptor: More productive web applications*, *Google Chart Tools*, *Design Patterns in Java I*, *Eclipse: Extreme Productivity*, *TDD with Java*, *Mock Objects in Java*, *Selenium*, *C# I*, *C# II*, *C# III*, *Integration tests in Java*, *Java I*, *Design Patterns C# I*, *Tests in C#*, *Spring MVC*, *PHP and MySQL II*, *Testing with Rest Assured*, *JSTL library*, *Refactoring in Java*, *Java II*, *jQuery*, *Design Patterns Java II*, *PHP e MySQL I*, *UML*, *ASP.NET MVC*, *SOLID principles in Java*, *Vagrant*, *Jasmine*, *MySQL I*, *Data Structure*, *Statistics I*, *Statistics II*, *Introduction to C I*, *Introduction to C II*, *Introduction to C III*, *Functional Programming with Clojure*, *Meteor*.
Summary: 37 courses, 169,001 enrollments of which 54,919 completed the course, 36,756 evaluations with an average of 8.84 out of 10 (as of May, 21st 2017).
2. Lecturer at Mackenzie University for 3 years.
Topics: Software Engineering Topics (2 editions) and Data Persistence (2 editions)
3. Online course at Udemy: Learn TDD in 24 hours.
Summary: 466 students from 48 different countries. Overall evaluation: 4,33 out of 5.
4. Co-teaching at TU Delft.
Topics: Software Architecture (MSc program), Software Testing (Bachelors program).

Tutorials in Conferences

1. **Aniche, M.F.**, Gerosa, M. A. MetricMiner: Mining Source Code Repositories. CBSoft 2015, Belo Horizonte, Brazil. *In portuguese.*
2. **Aniche, M.F.**, Oliva, G. A., Gerosa, M. A., Software Evolution: Tool, Techniques, and Metrics. CBSoft 2011, São Paulo, Brazil. *In portuguese.*

SUPERVISED STUDENTS

1. Suelen Goulart Carvalho (USP)
Focus: Code smells in Android applications. Following my ICSME 2016 paper. MSc program. Expected conclusion: dec/2017.
2. Jeroen Castelein (TU Delft)
Focus: Automated test generation for SQL queries. MSc program. Expected conclusion: aug/2017.
3. Kristín Fjólá Tómasdóttir (TU Delft)
Focus: Why and how developers use linters in JavaScript. MSc program. Expected conclusion: aug/2017.
4. Tom den Braber (TU Delft)
Focus: An approach to generate the exception flow of PHP programs. MSc program. Expected conclusion: aug/2017.
5. Michel Kraaijeveld (TU Delft)
Focus: Automated detection of breaking changes in JavaScript libraries. MSc program. Expected conclusion: aug/2017.
6. Francisco Sokol (USP)
Focus: MetricMiner: A tool to ease mining software repositories. Bachelors program. 2012.

PARTICIPATION IN MSC THESIS COMMITTEES

1. Rick Wieman. *What Does Passive Learning Bring To Adyen?* TU Delft, Mar/2017.
2. Peter Evers. *Finding Relevant Errors in Massive Payment Log Data.* TU Delft, Jan/2017.

SERVICE TO THE COMMUNITY

Program Committes

1. CHASE (International Workshop on Cooperative and Human Aspects of Software Engineering), 2017.
2. SCAM (Internal Conference on Source Code and Manipulation), 2017.
3. SANER Era Track (International Conference on Software Analysis, Evolution and Reengineering), 2017.
4. ICSME NIER (International Conference on Software Maintenance), 2017.
5. MSR Challenge track (International Conference on Mining Software Repositories), 2017.
6. SBES Education track (Brazilian Symposium on Software Engineering), 2017.
7. SBES Thesis Workshop (Brazilian Symposium on Software Engineering), 2017.
8. VISSOFT (International Conference on Software Visualization), 2017.
9. WASHES (International Workshop on Social, Human, and Economical Aspects), 2017.
10. WBMA (Brazilian Workshop on Agile Methods), 2015.
11. PLoP (Pattern Languages of Programming), 2015.
12. WBMA (Brazilian Workshop on Agile Methods), 2014.
13. WBMA (Brazilian Workshop on Agile Methods), 2013.

Chairs

- Experience Report Chair at OSS (International Conference on Open Source Systems), 2014.

External Reviews

1. SIGCSE (ACM Technical Symposium on Computer Science Education), 2017.

OPEN SOURCE DEVELOPMENT

1. RepoDriller. A Java framework that eases mining software repositories.
<http://www.github.com/mauricioaniche/repodriller>. 59 stars and 19 forks on GitHub.
2. SpringLint. Code smells detector and code metrics analysis for Spring MVC applications. The tool was developed during my PhD.
<http://www.github.com/mauricioaniche/springlint>. 40 stars and 1 fork on GitHub.
3. Restfulie.NET. A .NET version of Restfulie (<http://restfulie.caelumobjects.com>), a framework that allows REST level 3 in ASP.NET MVC applications. Now the framework is obsolete as new versions of ASP.NET MVC supports REST natively. 48 stars and 15 forks on Github.
